BCom Commerce & Tax

Govt. K.N.M. Arts & Science College Kanjiramkulam
Trivandrum - Kerala University
(03/2018 - 03/ 2021)

Languages Proficiency

- English
- Malayalam

Projects

1. Travel Guide (Travel Planning Platform) 🐙GitHub

Streamlined platform to enhance travel planning with centralized booking and management features

Tech Stack

React | Node.js | Express | MongoDB | Tailwind

Features

- Book hotels, taxis, and travel packages.
- User reviews and ratings for taxi
- Secure Authentication: Implemented using Bcrypt for password encryption and JWT for token-based authentication.
- Client-Side Validation: Integrated React Hook Form for robust, user-friendly validation across all forms in the platform.

2. Child Crescendo (Vaccination Platform) 🐙GitHub

Comprehensive platform to streamline vaccination and child care management for parents

Tech Stack

TypeScript | React | Redux | Node | Express | JWT

Features

- Secure signup and login with encrypted passwords and JWT-based authentication.
- Chat functionality between parents and vaccine centers or health professionals
- Book vaccinations, register children, and receive vaccine notifications.
- Schedule appointments with health professionals and provide feedback.

3. Shout-out (Social Media app) 🐙GitHub

An Individual Project: Secure & Responsive Social Media App with User Authentication and CRUD Functionality

Tech Stack

Mongo DB | React | Node JS | Express JS| Chakra UI
JWT | Bcrypt | Firebase | Cloudinary | ES6 | CSS 3

Features

- Users can Create, Read, Update, and Delete posts,
- Multiple Users can sign in through Google OAuth 2.0
- Validated sign-up form from client and server-side
- Implemented authentication and authorization using JWT.
- Passwords are encrypted using bcrypt library.
- Developed a fully responsive design
